

IRONICA

Granulated Organic %55

Introduction

Ironica Granulated Organic 55%

Organic fertilizer is made from natural leonardite materials in Granule form, for soil application before planting.

It can be mixed with various chemical and animal fertilizers to increase their productivity.

Composition:

Humic acid.....	9.5 %
Organic matter.....	45 %
(O.C).....	26 %

Uses for which it is recommended IRONICA granulated organic 55%

- To provide the soil with a spongy structure
- To improve the effectiveness of mineral fertilizers
- To correct soil mineralization and saline soils
- To increase production and bring forward harvesting dates
- To increase crop production

TIME OF APPLICATION

Consumption	Time	Soil application
150-500 Kg/Hr	Before planting mix with granular fertilizers	Cereals and vegetable
1-3 Kg/Tree	During plant growth before harvesting	Mature trees
250-500 g/Tree	During plant growth before harvesting	Young fruit trees

The dosage should be increased in the following cases:

- 1-The soils with very low organic matters
- 2-Multi-cultured in a year
- 3-The revival of moorlands
